PROFESSIONAL SUMMARY

Technology and operations professional with experience spanning quality assurance, technical support, customer service, financial and banking operations, data-driven processes, systems troubleshooting, and back-office workflows. Current focus combines QA, AI-assisted workflows, automation, and technical analysis to validate systems, identify problems, streamline repetitive processes, support customers and users, analyze information, and create more reliable workflows. Hands-on development includes Python, AI, cloud technologies, APIs, FastAPI, SQLite, Streamlit, and agentic workflows, backed by strong communication, documentation, customer focus, analytical thinking, and operational discipline.

CORE VALUE

Technology & QA: Manual and regression testing, QA test planning, interface validation, defect analysis, systems troubleshooting, technical support.
Automation & AI: Python, Pandas, shell scripting, workflow automation, AI assisted development, LLM-based parsing, API workflows.
Operations & Financial Services: Transaction processing, reconciliation, data validation, mortgage operations, corporate trust, customer and stakeholder support, process documentation.

EXPERIENCE

IT Consultant / QA Development | 2016

NITAV Consulting | Hillside, NJ

- Provided IT consulting, customer-focused technical support, QA validation, and systems troubleshooting across mixed macOS/Windows environments.
- Developed and executed QA test plans for web applications, including regression testing, interface validation, and defect analysis; built automation scripts to streamline maintenance, data handling, and system monitoring.
- Analyzed logs, network behavior, and performance metrics to identify root causes and improve reliability; documented procedures and testing results to support repeatable, audit-ready workflows.

Technical Support, Information Systems | 2014

Long Island University | Brooklyn, NY

- Supported a high-volume technical environment serving 9,000+ students, faculty, and staff, providing customer focused support across hardware, software, network, and mixed macOS/Windows systems.
- Managed equipment inventory, coordinated repairs, maintained asset records, prepared operational reports, performed system recovery and remediation, and documented incidents and configurations.
- Developed repeatable troubleshooting procedures to improve consistency, service delivery, and resource planning.

Trust Analyst, Business Technology | 2008

The Law Debenture Group | New York, NY

- Managed daily processing, reconciliation, and quality control for approximately $7M in corporate bond transactions across multiple financial systems.
- Audited transaction reports, investigated discrepancies, corrected data issues, supported trust and trade operations, and led fixed-asset data migration with stakeholder validation.
- Reviewed financial documentation to investigate trade issues, communicated findings to auditors and senior stakeholders, and documented procedures and process improvements.

Funding Post Closer - Mortgage Technology | 2007

Bank of America / Countrywide Home Loans | New Orleans, LA

- Managed and validated a daily pipeline of 50+ mortgage files, supporting accurate, compliant, and timely funding operations.
- Analyzed loan and financial documentation to identify discrepancies, data issues, and potential risk conditions; coordinated with underwriting, closing teams, and financial institutions to resolve issues and maintain data integrity.
- Supported restoration of IT workflows following infrastructure disruption and documented repeatable quality control procedures to improve operational consistency and post-closing accuracy.

Bond Operations Specialist, Corporate Trust Services | **2004**

U.S. Bank | New York, NY

- Supported rollout and validation of U.S. Bank's online bond-processing platform, performing structured QA-style testing to validate securities workflows, identify defects, and document system behavior.
- Managed daily processing and reconciliation of $10M+ in corporate bond redemptions and certificate transactions while maintaining data integrity across financial systems.
- Investigated and resolved complex trade discrepancies, including a $1.1M transaction issue; verified settlement details, escalated anomalies, and contributed to process documentation and system reliability improvements.

EDUCATION

Pace University, Seidenberg School of Computer Science & Information Systems / *New York, NY*

Graduate-level doctoral coursework in Computer Science (studies on hiatus)

Long Island University, School of Business & Information Science / *Brooklyn, NY*

Master of Science in Computer Science, with Distinction | Sigma Beta Delta scholastic achievement | Certificate of Excellence

Hunter College, City University of New York / *New York, NY*

Bachelor of Arts in Political Science | Debate Team | Technical Assistant, Leona & Marcy Chanin Language Center

SELECTED PROJECTS

- Command Center / Job Application Workflow - Built a practical workflow system using FastAPI, SQLite, Streamlit, JSON integration, and Swagger-based API testing for application tracking and operational follow-up.
- Automated System Maintenance - Built shell-based cleanup, logging, and diagnostics automation for repeatable system-maintenance workflows.
- Data Processing & QA Validation Pipeline - Developed Python/Pandas workflows to clean, transform, and validate datasets with automated consistency checks.
- Agentic AI / MCP Workflow - Built and tested a local model-context workflow using Node.js, API integration, and desktop AI tooling as hands-on agentic engineering practice.

SELECTED CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Google AI Essentials | Applied Generative AI Specialization (Purdue/Simplilearn) | Microsoft Azure Generative AI program | PyMC Labs | AWS AI Practitioner learning | IBM AI Fundamentals | Harvard AI/Python | DeepLearning.AI Agentic AI

AWARDS & RECOGNITION

- Merit Award / management recognition for restoring critical technology workflows and supporting business continuity after Hurricane Katrina.
- Service of Excellence Award nomination for customer service and operational reliability in Corporate Trust Services.
- Graduate Academic Distinction and Sigma Beta Delta recognition for academic performance at Long Island University.
